

KEEPING THE BLUE PLANET GREEN

PEAT SORB™ THE SUPERIOR & EXCEPTIONAL ATTRIBUTES

- Peat Sorb™ is an environmentally friendly oil & chemical absorbent product from Canada.
- Peat Sorb™ is a modified peat product with a moisture content of 7% – 10%. When dried to this level it repels water and absorbs oil on contact.
- Peat Sorb™ is equally effective on land and water.
- Peat Sorb™ is non-leaching. A hydrocarbon absorbed into Peat Sorb™ is retained until it degrades.
- Peat Sorb™ is a humic mass that is already in a biodegraded state; it will break down after a hydrocarbon has to become a fertilizer in a landfill site.
- Peat Sorb™ is lightweight for easy handling and transportation.
- Peat Sorb™ is non-abrasive. It can be used around machinery without fear of damage to metal, plastic or rubber parts.
- Peat Sorb™ pads and rolls retain more oil than the leading polypropylene.
- Peat Sorb pillows and socks are filled with Peat Sorb™ that can be used to contain oil spills and seepage.
- Peat Sorb™ can be applied manually or mechanically.
- Peat Sorb™ will pick up a full range of petroleum products from crude oil to gasoline and has been used to solidify and absorb resins, PCB's, coal tars, fatty acids and hydrocarbon based inks.
- Pound for pound Peat Sorb™ is ten to fifteen times more effective than clay based "kitty litter" type sorbents.
- Peat Sorb™ products will not attract insects or rodents.
- Peat Sorb™ has been tested in independent laboratories and meets the requirement of the Toxicity Characteristic Leaching Procedure, the Paint Filter Test and the Liquid Release Test.
- Peat Sorb™ is an effective vapour suppressant.
- Peat Sorb™ can be safely buried or burned in most jurisdictions subject to restrictions that may apply if it has been used to clean up hazardous waste.
- Peat Sorb™ products provide a comprehensive approach to meeting long standing environmental responsibilities and new legal requirements
- Peat Sorb™ products are used daily around the world in ships, factories, transportation facilities, ports, refineries, garages, boats and golf courses; the products are available from local stocking distributors.
- Peat Sorb™ helps save companies money with reduced employee liabilities from health and handling concerns.

KEEPING THE BLUE PLANET GREEN

PROPERTIES OF PEAT SORB™

- Absorbs on Contact
- Effective on Land & Water
- Non-Leaching
- Will not harm machinery
- Lightweight
- Non-Abrasive
- Vapour Suppressive
- Easily Disposed of
- Non-toxic
- Cost effective
- Zero Health Risks

SOURCE

Peat Sorb™ products are made from 100% Canadian Sphagnum Peat Moss. Canada has more than 250 million acres of peat lands covering over 12 percent of the country.
